A REPUTATION BUILT ON PERFORMANCE.

Why A-dec®

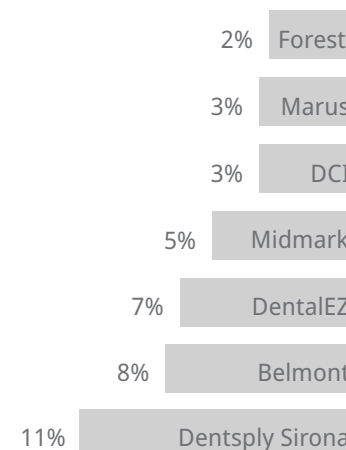

As one of the world's leading dental equipment manufacturers, A-dec understands the importance of performance. Your equipment must be consistently operational and efficient, while ensuring an exceptional patient experience. A-dec delivers.

We began in 1964 with a commitment to get it right—and that mission has never changed. Today, the A-dec name stands for high quality and long-lasting reliability, with dental chairs, lights, and delivery systems that offer a minimum 20-year life.

Amortized over the number of years of service, the long-term ownership costs are lower with high quality A-dec dental equipment. It's a choice you can make with confidence.

THE A-DEC DIFFERENCE.

Added Value

Even with the extra rigors of government environments, A-dec dental equipment stands up to continuous use. It's backed with a 10-year warranty and a team of government specialists to support you long after the sale.

As a veteran-founded company, A-dec maintains FSS and GSA contracts, e-commerce storefronts such as ECAT and GSA Advantage, and a spectrum of unique channels to make procurement faster and easier:

- A-dec equipment is available to order on the Defense Logistics Agency Electronic Catalog
- A-dec ECAT Contract SPE2DH-24-D-0006
- A-dec Federal Supply Schedule (FSS) V797D-70087

The A-dec® 500 dental chair supports a **patient weight** capacity up to 500 lbs. (227 kg.) and is tested to 4X (2000 lbs./907 kg.).

EXCLUSIVE SUPPORT FOR GOVERNMENT.

Specialized Team

A-dec has a team dedicated exclusively to federal government. You'll experience an unparalleled level of service, supported by a team of specialists who leave no detail to chance.

- **Regional Account Manager:** As your primary contact, your account manager is an active part of space planning and facility design, helping to identify your specific needs and translate them into equipment options.
- **Territory Manager:** Responsible for meeting your day-to-day business needs, your A-dec Territory Manager is your go-to resource for onsite training, ongoing need identification, space planning and consulting.
- **Designer/Floor Plan Specialist:** Taking space planning a step further, your design specialist proposes options for your unique needs using 3D visualization.
- **Project Coordinator:** Your project coordinator keeps your project running smoothly and to your expectations, facilitating order processing through A-dec to meet the mutually agreed-upon installation date.
- **Training Specialists:** For additional support, specialty training is available to your technicians, onsite and at our A-dec Educational Center in Newberg, Oregon.

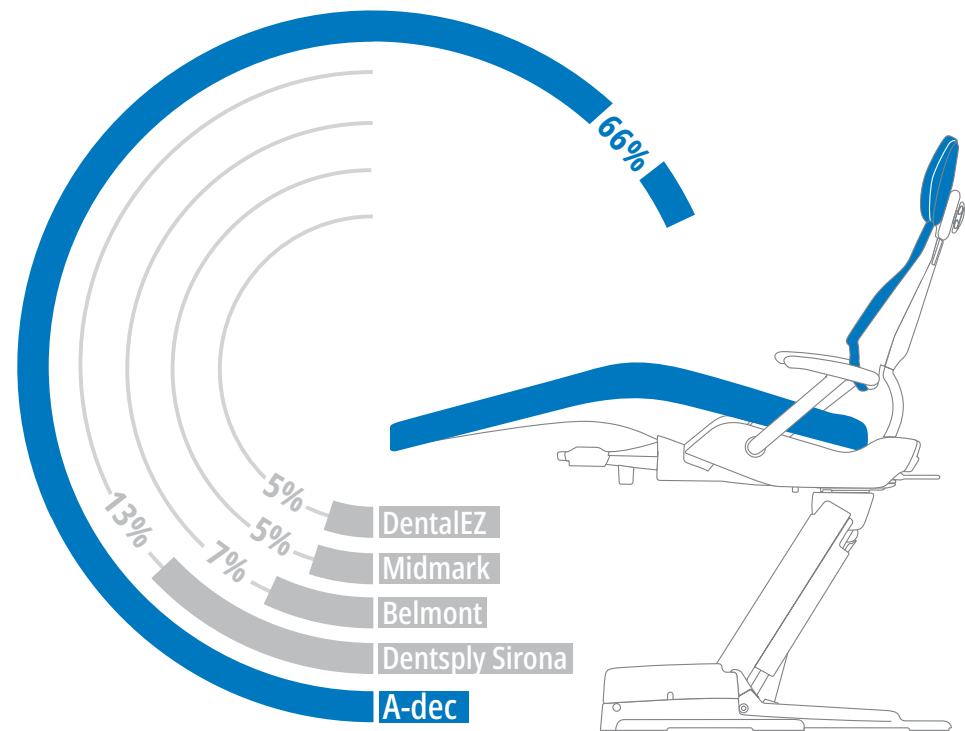

A-dec also offers certified ergonomic assessments to help optimize your equipment and improve the long-term wellness of the dental team.

DESIGNED FOR EFFICIENCY AND WORKFLOW.

Smart Solutions

A-dec dental equipment supports the need for efficiency and workflow—all without a single compromise to thoughtful design, durability, and patient comfort. Utilizing standardized equipment platforms across military bases, hospitals or health clinics creates a familiar layout, making it easier for doctors and other transferring personnel to quickly get up to speed. Your A-dec representative can share best practices and effective designs that we have implemented in other clinics. We'll help you be proactive with your equipment planning and purchase—to maximize your investment dollars now, and give you the flexibility to integrate new technologies in the future. Ask your representative for an A-dec ECAT reference guide to see A-dec equipment packages available to order on the Defense Logistics Agency Electronic Catalog system.

SIMPLE, EASY AND INTUITIVE.

Technician Friendly

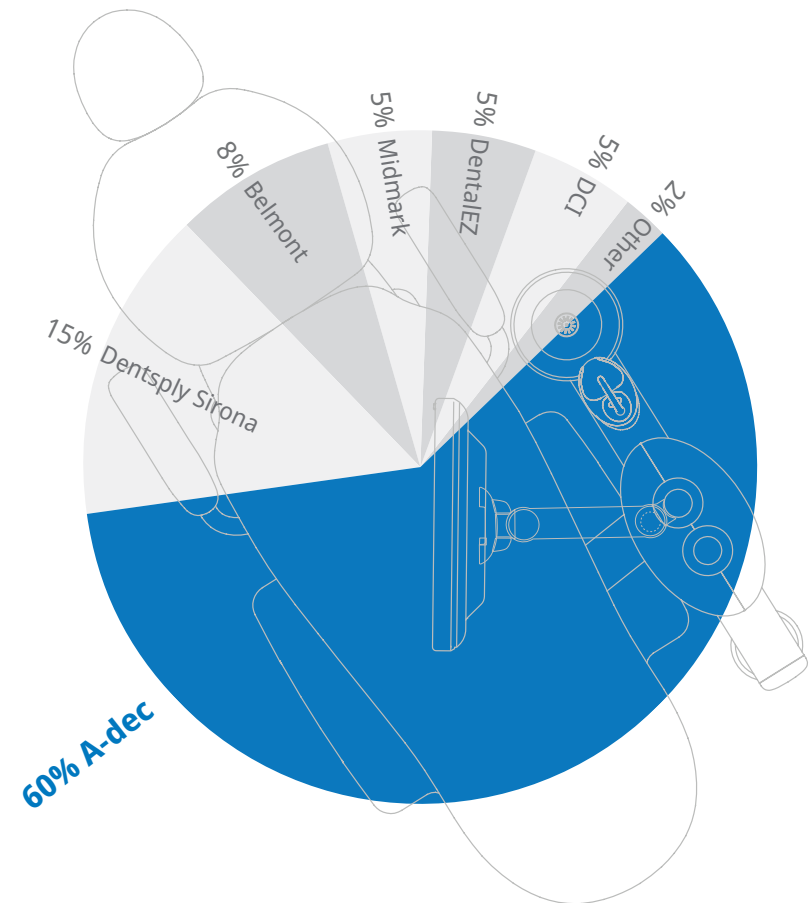

A-dec's durable, reliable dental equipment is engineered for easy service and maintenance. Our products are designed, refined, simplified, and integrated with service technicians in mind—so Biomedical Equipment Technicians (BMETs) will always have the right tools in their bags to get everything up and running quickly. No matter how remote the location, most repair parts ship within 24 hours.

Serious Customer Support

When you call A-dec, an actual person answers the phone, so there's no time wasted in an endless loop of transfers. Service representatives are fully prepared to answer any product question (even for equipment that hasn't appeared in a catalog in more than 25 years). They are certified and technically trained to help with everything from taking an order to troubleshooting. On those rare occasions when more perspective is needed, there's a group of engineers just down the hall for extra support.

PROVEN RELIABILITY PAYS FOR ITSELF.

Wise Investment

A-dec dental equipment delivers proven performance year after year, with fewer service calls and product downtime. That reliability pays off in the long term—and it's a wise use of your equipment budget.

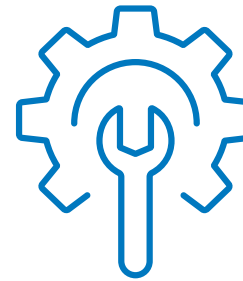

BEST IN QUALITY

66% of dentists surveyed in a 2025 independent study voted A-dec best in quality.

EXTRA REASSURANCE

The hydraulic lift components do the heavy lifting, so we back them with a 10-year warranty.

SIMPLIFIED MAINTENANCE

A-dec designs with simplicity in mind. Because while smart design with fewer moving parts makes products intuitive, it also lowers their risk of failure. You can count on simple maintenance and fewer service calls.

HIGHER ROI

A-dec equipment is designed to last longer and perform efficiently without costly downtime, for a higher return on every tax dollar invested.

A-DEC RELIABILITY

A-dec's 10-Year Warranty covers dental chairs, delivery systems, lights, dental furniture, and stools for peace of mind. We're here to support you.

BEST LONG-TERM VALUE

63% of dentists surveyed in a 2025 independent survey voted A-dec the best long-term value (the next closest competitor came in at 11%).

QUALITY IMPACTS LONGEVITY.

Cost of Ownership

Distinguishing between products to make confident purchase decisions is challenging. But have you followed the total cost of the equipment beyond the acquisition phase? The major component that separates superior quality from low quality is the Cost of Ownership. Because these costs are not always quantified, they are often overlooked. The cost of ownership concept is truly about value—not only the value of the product, but also the value of a dental team's time and productivity:

When fixed and recurring costs are calculated down to end of service life, the amortized cost of high-quality equipment is lower in the long term.
